

Hello,

My name is Roxanne Sealing, CMA(AAMA) I am the current secretary of the Connecticut Society of Medical Assistants. I am in full support of HB6025, which allows all MAs in the state of Connecticut the right to administer injections according to their respective scope of practice. Members of The Connecticut Society of Medical Assistants have the education to administer all types of injections to all ages across the board. This includes placing oxygen on a patient of any age.

I am actually a CMA(AAMA) who lives and works in the State of Maryland. I give all types of injections in the office where I work. I feel comfortable having any one from the CTSMA administer, to me, an injection of any type as they all have the gold standard of education. I also understand that the American Medical Technologists support HB6025.

Thank you,
Roxanne
